CASE STUDY

QLD - CAPITAL GROWTH & CASH FLOW

This was an investment made on behalf of 2 children, utilising an inheritance. The purchase was made in trust to create future wealth.

The strategy was to purchase a well-priced, growth property, allowing the cash deposit to minimise the mortgage required to an amount that could be covered (P&I) by the rent received. Equity creation came from both property growth and reducing the bank debt.

The property was held for nine years and sold to the tenants in July 2024.

As both adult owners established themselves in their careers and earned higher incomes, it was time to refresh their investments to gain more depreciation and diversify their asset base.
